

MCSTC UPDATE

April 15, 2020

Because of the legislation, all Capitol and Renewal projects are on hold until further notice. We are still going to respond to emergency calls as needed.

There will be some inspections (ex. fire alarm) that will be carried out during this period of time that are within the limitations of the legislation.

Management is working on the dynamics of coordinating this work in unison with caretaking staff etc... this is expected to start mid to late next week.

Everything else is status quo!!

Be safe and take care.
